

CALC — Profit & Loss

Build with Gemini XPRIZE 2026 · Money & Financial Access · June 11 – August 17, 2026 · No legal entity · Pre-revenue

Revenue

MONTH	ARMS-LENGTH THIRD-PARTY REVENUE
June 2026 (from the 11th)	\$0.00
July 2026	\$0.00
August 2026 (to the 17th)	\$0.00
Total	\$0.00

Three people outside the team have used the application; all three are personal acquaintances of the founders, which excludes them by the competition’s definition. We report the exclusion rather than work around it.

Operating expense by category

Source: Google Cloud billing report, project `gen-lang-client-0089539356` . Billed in MXN; USD at 18 MXN/USD. Each line is a count of Gemini API calls from production logs multiplied by a cost per call measured from `usageMetadata` : \$0.0087 per text call, \$0.0218 per receipt. The residual against the invoice is assigned to R&D, because development traffic leaves no request log.

CATEGORY	MXN	≈ USD	%	PRINCIPAL DRIVER
Cost of goods sold	18.90	1.05	45%	37 receipt photos at 2.5× the cost of a text question
Research & development	23.38	1.30	55%	Daily accuracy exam: 12 cases against the live model
Sales & marketing	0.00	0.00	0%	No acquisition attempted
General & administrative	0.00	0.00	0%	No entity, payroll or office; finance function is an agent
Total	42.28	2.35	100%	

All infrastructure fell inside free tiers: Cloud Run scales to zero and the five agents are scheduled jobs that wake, work and exit. Within each model call the dominant driver is thinking tokens, billed at the output rate — 417 against 119 of visible answer on a text call.

Net result

Revenue	0.00 MXN	\$0.00 USD
Operating expense	42.28	2.35
Marketing and customer acquisition	0.00	0.00
Net	−42.28 MXN	−\$2.35 USD

Unit economics

ASSUMED USAGE	COST PER USER / MONTH
Light — 3 questions/day, 2 receipts/week	\$1.27
Medium — 8 questions/day, 1 receipt/day	\$3.04
Heavy — 20 questions/day, 2 receipts/day	\$6.83

Usage levels are assumptions and labelled as such; the per-call costs are measured and were validated against the invoice. Fixed cost is ~\$3.35 USD/month, so fixed costs are covered at roughly three paying users. The whole expense base is \$2.35 USD: these percentages describe how we spend, not how much.
