

CALC — Revenue Evidence

Build with Gemini XPRIZE 2026 · Money & Financial Access · June 11 – August 17, 2026

Third-party arms-length revenue: \$0.00

There is no bank statement or payment-processor dashboard to attach, because no payment was ever received.

Why there is no revenue document

CALC has taken no payments. No merchant account, payment processor or business bank account was opened, so no statement exists to produce. Three people outside the team have used the application; all three are personal acquaintances of the founders, which excludes them from arms-length revenue by the competition’s own definition. We report that exclusion rather than work around it.

Verifiable expense evidence

What we can document is the cost side, from the Google Cloud billing report for project `gen-lang-client-0089539356` . Billed in Mexican pesos; USD converted at 18 MXN/USD.

EXPENSE CATEGORY	MXN	≈ USD	% OF TOTAL
Cost of goods sold (cost to serve)	18.90	1.05	45%
Research and development	23.38	1.30	55%
Sales and marketing	0.00	0.00	0%
General and administrative	0.00	0.00	0%
Total operating expense	42.28	2.35	100%

Almost the entire bill is Gemini API consumption; the largest single SKU is output tokens at MXN 26.83. All infrastructure — Cloud Run, five Cloud Run Jobs, Firestore, Cloud Scheduler, Cloud Build, Artifact Registry and Cloud Logging — fell inside free tiers.

Net result

Revenue	0.00 MXN	\$0.00 USD
Operating expense	42.28	2.35
Sales and marketing	0.00	0.00
Net	−42.28 MXN	−\$2.35 USD
